

NHTSA Lift Daily Preventive Maintenance Schedule Pre-Trip Inspection Guide

Vehicle Number: _____ Date: _____

Inspector: _____

Before each scheduled day of lift service, operate lift minimum one complete cycle and inspect each of the following:

- Verify platform lighting when lift is deployed and pendant illumination when lift is powered.
- Complete a visual inspection for bent or damaged components, missing hardware and all decals are legible.
- Verify platform when stopped at bus floor level has a smooth transition for wheelchair movement.
- Vehicle movement is prevented unless the lift door is closed ensuring the lift is stowed.
- Lift operation is prevented unless the vehicle is secure.
- The inner roll stop will not raise if occupied.
- The outer barrier will not raise if occupied.
- A warning will activate if the threshold area is occupied when the platform is 1" below floor level.
- Platform movement shall be interrupted unless the outer barrier is up.
- The platform will not fold/stow if occupied.
